PROFESSIONAL SUMMARY

CFA charterholder and FRM with six years in investment banking, private equity, and corporate FP&A, now designing and evaluating AI reasoning on complex financial problems. Combines DCF and LBO modeling with multi-document evaluation cases, gold-standard solutions, and weighted scoring rubrics across M&A, valuation, accounting, and corporate forecasting.

PROFESSIONAL EXPERIENCE

Appen — **Finance AI Trainer** Remote | 2024–Present

- Independently designed 12 multi-document financial evaluation cases spanning M&A, LBO, DCF, and accounting treatment, requiring multi-step reasoning across SEC filings, spreadsheets, and written analysis.
- Wrote gold-standard reference solutions and weighted scoring rubrics, including expected corrections for planted errors.
- Evaluated 550+ AI-generated financial analyses over eight months; recurring failures included terminal value, debt-schedule roll-forwards, unsupported margin expansion, and revenue recognition.
- Built a 40-question internal evaluation set, tested it against 25 model outputs, and raised inter-rater agreement above 85%; standards adopted by a team of eight reviewers.

Teck Resources — **FP&A Manager, Corporate** Vancouver, BC | 2022–2024

- Led annual budgeting and quarterly forecasting for three business units supporting more than $2 billion in revenue.
- Implemented a reporting framework that improved forecast accuracy by 16% within two quarters, measured on EBITDA variance versus actuals.
- Automated forecasting and variance reporting in Python and Power BI, reducing manual preparation by roughly 20 hours per month.

ARC Financial — **Private Equity Associate** Calgary, AB | 2020–2022

- Led financial due diligence on acquisition targets: historical models, cash-flow quality, working capital, and growth assumptions.
- Built LBO models for returns, capital structure, and downside cases on platform and add-on opportunities.
- Evaluated 110+ potential investments, supported two completed add-ons, and prepared IC materials; defended assumptions in committee.

TD Securities — **Investment Banking Analyst, Energy & Power** Calgary, AB | 2018–2020

- Built three-statement models, DCFs, LBOs, and comparable company analyses for M&A and capital-raising mandates.
- Supported execution on more than $2.5 billion of transactions, including cross-border energy infrastructure and power generation deals.
- Prepared pitch materials, valuation summaries, and accretion/dilution analysis; coordinated diligence and data-room reviews.

SELECTED FINANCIAL & AI EVALUATION WORK

Take-private LBO gold standard. Full debt schedule, returns sensitivity, and covenant checks. Tested against 25 AI outputs at a 90%+ pass threshold; adopted as a reference by five reviewers.

DCF case with planted WACC and terminal-value faults. Authored the case, expected corrections, and scoring rubric. Tested against 20 outputs; consistently caught multi-step reasoning failures.

FP&A variance-analysis case. Reconciles segment revenue, FX, and budget-to-actual drivers across statements and management commentary. Calibrated with three reviewers; now in the standard set.

EDUCATION & CERTIFICATIONS

University of British Columbia — BCom, Finance Vancouver, BC | 2018

CFA Institute — Chartered Financial Analyst, 2021 · GARP — Financial Risk Manager, 2022
University of Toronto — Financial Technology Graduate Certificate, 2023 · CFI — Data Analysis for Finance, 2022 · Wharton Online — AI for Business Professionals, 2023

SKILLS

Modeling: three-statement, DCF, LBO, comps, precedents, accretion/dilution, model audit, IC memos · **FP&A:** driver-based forecasting, variance analysis, capital-project evaluation, GAAP/IFRS · **AI evaluation:** multi-document case design, gold-standard solutions, rubrics, error taxonomies, reviewer calibration, SEC verification · **Tools:** Excel, PowerPoint, Python (pandas, openpyxl), Power BI · **Languages:** English, Mandarin
